

## Do you have a wish list? Lots of ideas/lots to do and not enough time.....

**We can help you!**

**Manukau Institute of Technology (MIT)** is giving Auckland businesses a unique opportunity to have their **Bachelor of Applied Management/Graduate Diploma** final year students on a student work placement and work experience for a semester or less. This is **not a paid** role and students can work on a project to assist the businesses in the following areas: **Accounting; Human Resources; Marketing; Events/Communications; Project Management; Operations Management and Product Management.**

Another programmes that also require placements is:

**Bachelor of ICT** and

**Graduate Diploma in Tourism Management** – our students can do a range of entry-level duties in reservation, concierge, front desk, customer service and any other tourism-hotel-hospitality related industries.

Our students can work in your business for 2-4 months. You can engage more than one student for your business depending on the varied projects/work that you need help with. Students can work in your business for 1 -3 days depending on their study load.

We are now recruiting businesses for Semester 2, 2016 placements commencing end-July/early August. For current and future planning for your business, we have two placement intakes each year. Semester 1, mid-March and Semester 2, End-July.
